

TR-739	Titanium Dioxide
Applications	JTR-739 is specially designed and surface-treated for coatings & paints.

Typical Properties	
TiO2 Content (%)	≥92.0
Rutile Crystal Content	≥98.0
Sieve Residue of 45µm (%)	≤0.05
Volatile Constituents at 105°C (%)	≤0.5
Tint Reducing Power	≥1800
Oil Absorption (g/100g)	≤22
Water Extracted Resistivity (Ω.m)	≥80
Water Extracted PH	6.5-8.5
Inorganic Treatment	Silica-Alumina
Organic Treatment	Yes
Specific Gravity (g/cm ³)	≤4.1

Characteristics	JTR-739 is Silica-alumina treated rutile titanium dioxide pigment ,with high whiteness, excellent dispersion and high weathering resistance.
------------------------	--

Classification	ISO591 R2 ASTMD-476-84 II
-----------------------	------------------------------

Packing	25kg/paper-plastic compound bag 500kg/1000kg plastic woven bag
----------------	---
